## TARGET

The Wasp is designed for the PPG pilot who wants to continue to progress after leaving flight school and the recreational PPG pilot looking for a reliable wing that uses the latest technology.

## DESCRIPTION

Several performance enhancing-design features have been incorporated in the glider giving better stability and glider cleanliness. The Wasp offers outstanding launch characteristics and responsive handling. Double hangpoints on the risers means all harnesses are suitable. Positioned at the safer end of the EN/LTF-B range, and DGAC approved, the Wasp is a rock-solid glider that everyone will feel comfortable flying.
