TARGET

Blown out? Grab a SEED and refine your skills! Ground handling is never a waste of time, even for professionals. You can learn essential skills that directly relate to in-the-air flying. Deflations, stalls, brake pressure and active piloting can all be practised while kiting the SEED safely on the ground.

DESCRIPTION

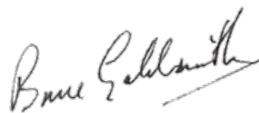

The SEED is our affordable premier training paraglider, made for ground handling only. The SEED was developed from the EN-B EPIC, and acts and feels like a full-size paraglider. It is made from durable 50g cloth and has three risers. It's a fun accessory for parawaiting at takeoff, practising kiting, or just goofing around like Spiderman.
