**120-220kg**

## TARGET

The Dual is designed as a tool for commercial pilots to offer their passengers the ultimate paragliding experience. It is also the perfect fun wing for hobby tandem pilots to share the wonderful feelings of flight with family and friends.

## DESCRIPTION

The Dual is an EN-B rated tandem paraglider designed by Bruce for sharing the fun. It has light, sensitive brakes and launches, flies and lands like a solo wing. It's available in one size of 40m<sup>2</sup> (flat) with a weight range of 120 - 220kg - we believe it is the perfect size for almost any couple.
